PROFESSIONAL EXPERIENCE

SOURCES Intern | SCEC/Verisk Analytics | Boston, MA

(June 2025 - Present)

- Contributed to seismic hazard research through the CyberShake project, supporting physics-based ground motion simulations that improved modeling accuracy by 20% for Southern California regions.
- Designed and implemented a Python-based GUI that reduced data selection and configuration time by 50%, enabling faster and more user-friendly access to CyberShake simulations for researchers.
- Assisted with researchers and utilized high-performance computing clusters to evaluate 100+ fault rupture scenarios, assessing their potential seismic impact on urban infrastructure.

Digital Solutions Associate | Saniset Fleet | Los Angeles, CA

(June 2025 - Present)

- Enhanced the Saniset Fleet website using Velo by Wix, integrating an AI chatbot and user-focused features that increased site engagement by 30% and reduced customer support response time by 40%.
- Collected and analyzed fleet performance and energy usage data among 50+ vehicles, helping shape sustainability strategies and support accurate compliance reports.
- Developed two interactive tools, a runtime estimator and an EV vs. combustion comparison calculator, used by 100+ clients to support data-driven purchase decisions.

LACCD Web Services Team Intern | Jacobs x BuildLACCD | Monterey Park, CA

(April 2024- April 2025)

- Collaborated with engineers and project managers to maintain data systems and improve website accessibility across 230,000+ users across nine colleges.
- Resolved 100+ web development tickets, participated in Agile sprints, and documented decisions to improve handoffs and project continuity.
- Supported high-priority web operations and delivered live tech assistance, cutting peak-period downtime by 35%.

IT Support Technician | RiverStreamz | El Segundo, CA

(March 2024 - November 2024)

- Served as a Field Support Technician for the 2024 Primary and General Elections, ensuring secure and reliable election infrastructure.
- Resolved 200+ issues related to Ballot Marking Devices (BMDs), ePollBooks, and printers, reducing average downtime per device by 50%.
- Documented procedures to support transparency, compliance, and the overall integrity of the electoral process.

EDUCATION

California State Polytechnic University, Pomona | CA
Bachelor's Degree | Computer Science

(Graduating June 2027)

East Los Angeles College | Monterey Park, CA
Associate's Degree | GPA: 3.68 | Dean's List

(Fall 2021- Fall 2024)

SKILLS

Programming Languages: C++, Java, Python, HTML, CSS.

Operating Systems: Windows, macOS, Linux.

Tools & Software: Visual Studio, jGRASP, Git, SFML, Drupal, MS Office (Excel, Word, PowerPoint, Teams), Photoshop, Premiere Pro.

Technical Skills: IT Support, Troubleshooting, Networking, QA, Debugging, Databases, Building/Upgrading PCs.

Professional Skills: Typing 80+ WPM, Teamwork, Problem Solving, Adaptability, Multitasking, Punctuality, Reliability.

Languages: English (Fluent), Spanish (Fluent), Cantonese (Spoken).

HACKATONS/PROJECTS

HACKMESA 2025 – LACCD

(May 2025)

Web-Based Fitness Platform - FitFusion

- Built a fitness tracking platform that allows users to log workouts and monitor metrics like body fat percentage, lean mass, and BMI.
- Designed front-end UI with HTML/CSS and JavaScript; created a backend with Flask and Python.
- Deployed the full-stack application using Render and added motivational features to support user consistency.
- Skills:** HTML/CSS · JavaScript · Flask · Python · Render · Artificial Intelligence (AI) · Front-End Development · Back-End Development.

BroncoHacks 2025 – Cal Poly Pomona

(April 2025)

Mental Health Tracker Website - Mentie

- Programmed a website to monitor users' mental health and track daily usage streaks.
- Deployed user authentication, an interactive data graph, and AI-based features for engagement.
- Integrated a backend database to persist user data and analytics.
- Skills:** Project Planning · Artificial Intelligence (AI) · Databases · Front-End Development · Back-End Web Development · Data Visualization.

EV/GAS Project – BuildLACCD

(February 2025)

- Performed a comprehensive on-site survey of our parking facilities to count gasoline-powered vehicles, electric vehicles, and EV charging stations.
- Mapped powertrain data for 200+ vehicles and cataloged the real-time availability of 15 EV charging stations across company parking lots using on-site observations and proprietary software.
- The primary goal was to calculate the current ratio of gas cars to EVs and assess whether our existing charging infrastructure meets campus demand.
- The data gathered will help inform recommendations for future sustainability efforts and infrastructure improvements.
- Skills:** Data Collection, Analysis, Technical Documentation, Sustainability Awareness, Communication & Reporting.

EXTRACURRICULARS

- GameGala 2025 Judge at Cal Poly Pomona – Conducted live interviews with 6–10 K–12 students presenting computer science and game development projects; provided constructive feedback and encouragement to foster their interest in STEM.
- STEM Advantage Scholar at California State Polytechnic University, Pomona.
- Active member of the Society of Hispanic Professional Engineers (SHPE), ELAC Engineering Club, and Mathematics, Engineering, Science Achievement (MESA) Program at East Los Angeles College (ELAC).
