EDUCATION

California State Polytechnic University, Pomona | Pomona, CA

Expected Graduation: May 2028

Bachelor of Science, Computer Science

GPA: 3.73

Affiliations: STEM Advantage, CodePath, Society of Hispanic Professional Engineers (SHPE), Male Success Initiative (MSI)

SKILLS

Programming Languages: Java, Python, C++, C#, Go, Rust, TypeScript, SQL, HTML, CSS

Courses: Data Structures and Algorithms, Object-Oriented Programming, Computer Networks

Frameworks & Libraries: React, Tkinter

Developer Tools: Git, Docker, VS Code, Copilot, Claude, Codex, Cursor

Cloud & Platforms: Azure, GitHub, Drupal, AWS

Networking: Network Infrastructure, LAN, WLAN, Router Installation & Configuration, Network Troubleshooting, TCP/IP, DNS, DHCP, Networking Interfaces & Protocols

Artificial Intelligence: Prompt Engineering, Large Language Models, Machine Learning

Languages: English (Fluent), Spanish (Fluent), Chinese/Cantonese (Fluent)

Interests: Rubik's Cube, Poker, and Chess

PROFESSIONAL EXPERIENCE

Software Engineer Intern - **LA County Public Works**, Alhambra, CA

April 2026 - Present

- Managing and updating the LACPW Waterworks Division website content using WordPress, improving site accuracy and UI/UX for 280,000+ residents

IT Support Technician - **RiverStreamz**, El Segundo, CA

Mar 2024 - Present

- Supported government election infrastructure, which consisted of hardware installation and configuration and troubleshooting network connectivity and hardware issues
- Diagnosed and resolved 100+ incidents as they occurred. Reducing the hardware/software incidents by 95%

Software Engineer Intern - **California Climate Education Center**, Los Angeles, CA

Sep 2025 - May 2026

- Built an interactive web platform for post-wildfire rebuilding, integrating tools for risk assessment, community resources, and resilient infrastructure planning aligned with the *U.S. Green Building Council* standards
- Engineered water resilience calculators, recovery mapping, and mobility planning to support the optimal solution for community rebuilding efforts. Deployed a digital guide, including fire-safe materials, solar integration, and stormwater systems, to improve accessibility of rebuilding resources

Digital Solutions Associate - **Saniset Fleet**, Los Angeles, CA

Jun 2025 - Sep 2025

- Developed a product price calculator that automated pricing logic to generate more accurate customer quotes
- Created an AI chatbot that enabled technical support and customer service requests, reducing the number of manual service tickets created and increasing customer engagement by 80%

Software Engineer Intern - **Statewide California Earthquake Center**, Boston, MA

Jun 2025 - Aug 2025

- Coded a Python Tkinter (GUI) based data configuration and retrieval automation tool used for seismic analysis systems, reducing the total time required to prepare data for analysis by 60% for all major seismic data sets
- Programmed a large language model for real-time technical assistance and implemented a seismogram reader capable of visualizing thousands of waveform files efficiently
- Presented my technical project at the SCEC Annual Meeting, sharing insights with seismology scientists from Harvard, Caltech, USC, and Stanford.

Software Engineer Intern - **Jacobs**, Monterey Park, CA

Apr 2024 - Apr 2025

- Maintained and optimized a web-based platform with over 230,000+ students, provided production and stage support.
- Resolved more than 100 development tickets created in the Agile sprints to document technology-based solutions to roadblocks for end users and improve team productivity

EXTRACURRICULARS

Hackathon Experience (Hacktech, Glitch UCLA, IrvineHacks, BroncoHacks, HackMESA)

2025-2026

- Collaborated in fast-paced hackathon environments to design, develop, and present innovative technical solutions under tight deadlines. Built an AI application using Google Gemini unreleased models. Integrating text, images, audio, videos, and sensor data

GameGala 2025 Judge | Cal Poly Pomona

2025

- Conducted live interviews with 6–10 K–12 students presenting computer science and game development projects; provided constructive feedback and encouragement to foster their interest in STEM.

Athletics | Soccer & Long-Distance Running

Ongoing
