EDUCATION

California State Polytechnic University, Pomona | Pomona, CA

Expected Graduation, May 2027

Bachelor of Science, Computer Science

GPA: 3.7

Affiliations: STEM Advantage, CodePath, Society of Hispanic Professional Engineers (SHPE), Male Success Initiative (MSI)

SKILLS

Programming Languages: C++, Java, Python, HTML, CSS, SQL, JavaScript, TypeScript

Operating Systems: Windows, macOS, Linux

Tools & Software: VS Code, jGRASP, Git, SFML, Drupal, Excel, Word, PowerPoint, Teams, Photoshop, Premiere Pro

Technical Skills: IT Support, Troubleshooting, QA, Debugging, Data Structures and Algorithms, Databases, Artificial Intelligence, R, Docker, React, Figma, Azure, UX/UI, prototype, wireframe

Languages: English (Fluent), Spanish (Fluent), Cantonese (Spoken)

PROFESSIONAL EXPERIENCE

Software Engineer Intern | WLAC Climate Change | Los Angeles, CA

September 2025 - December 2025

- Built a responsive climate awareness hub using HTML, CSS, JavaScript, and React, consolidating six sustainability initiatives into one centralized platform and deploying project websites via GitHub.
- Designed and implemented accessible, mobile-first UI/UX prototypes in Figma and developed a secure user authentication system for credential management.
- Created a detailed Altadena wildfire simulation in Unreal Engine to analyze fire spread behavior and evaluate climate mitigation strategies.

Digital Solutions Associate | Saniset Fleet | Los Angeles, CA

June 2025 - September 2025

- Developed custom site functionality on Wix (Velo), including a dynamic product cost calculator that automated pricing logic and improved customer quote accuracy.
- Implemented an AI-powered chatbot to automate Tier 1 customer support, reducing manual inquiries by 50% and increasing engagement by 40%.
- Conducted end-to-end QA testing and integrated analytics dashboards to monitor performance metrics, maintaining 99.9% uptime and enabling data-driven business optimization.

SOURCES Intern | SCEC/Verisk Analytics | Boston, MA

June 2025 - August 2025

- Analyzed 500+ GB of CyberShake seismic simulation data to support earthquake risk modeling and hazard assessment research under Dr. Wang.
- Built a Python Tkinter GUI that automated data configuration and retrieval workflows, cutting setup time by 60% across four major seismic datasets.
- Integrated an LLM-powered assistant for real-time technical guidance and developed a high-performance seismogram reader to visualize thousands of waveform files efficiently.

LACCD Web Services Team Intern | Jacobs x BuildLACCD | Monterey Park, CA

April 2024-April 2025

- Maintained and optimized web systems serving 230,000+ users across nine LA community colleges, improving accessibility and backend data reliability.
- Resolved 100+ development tickets within Agile sprints, documenting architectural decisions to enhance team collaboration and continuity.
- Delivered real-time production support during high-traffic periods, reducing peak downtime by 35%.

IT Support Technician | RiverStreamz | El Segundo, CA

March 2024, November 2024

- Deployed and maintained secure election infrastructure for the 2024 Primary, General, and 2025 Special Elections, ensuring compliance and system integrity.
- Diagnosed and resolved 200+ hardware/software issues involving Ballot Marking Devices, ePollBooks, and printers, cutting average device downtime by 50% and maintaining operational continuity.

EXTRACURRICULARS

- GameGala 2025 Judge, **Cal Poly Pomona** – Conducted live interviews with 6–10 K–12 students presenting computer science and game development projects; provided constructive feedback and encouragement to foster their interest in STEM.
- Participated in **BroncoHacks** and **HACKMESA (2025)**, collaborating in fast-paced hackathon environments to design, develop, and present innovative technical solutions under tight deadlines.
- Passionate about soccer and long-distance running, demonstrating teamwork, discipline, and endurance both on the field and through consistent distance training.
